

Device: Lumens VC-A50P/NewTek NDI-HX PTZ1

Device Configurations

Device configuration options exist:

- Index 1: **Video Standard**
 - If "0" = Reserved
 - If "1" = Pal mode
 - If "2" = NTSC mode

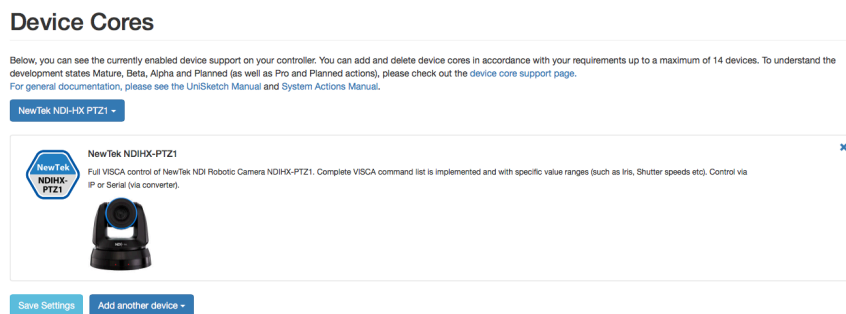

Example:

Enabling "Video Standard" to NTSC mode could look like this device configuration code: "D0:1=2" where the general form would be "Dx:0=1" where "x" is the number of the device core as installed on the controller (starting with zero for the first device core).

To confirm that a device configuration is in fact detected by the controller, please check it out on the serial monitor where it will be mentioned:

```
Memory A-D restored
Compiled: Aug  8 2018 16:56:55
DeviceCore #0: NEWTEKNDIHXPTZ0, IP = 192.168.10.213
Setting NTSC mode for 'NEWTEKNDIHXPTZ device core
setup() Done
-----
System action 16
☐ Auto scroll
```

Example: If the NewTek device core is the first like below:

Then setting the "Video Standard" would be set by this configuration under "Manage Media" on your configuration page for your controller on cores.skaarhoj.com

Device Core Options

Some device cores support additional options that can be defined through this text field. Please refer to the manual for the particular device core for details.
